

# Campus Master Plan Update

This plan was developed in parallel with the current Strategic Plan. This update identifies the buildings to be constructed and assumes accompanying infrastructure requirements.

	PHASE 1 COMPLETE
	PHASE 2 COMPLETE Q3 2021
	PHASE 3 4.2 M
	PHASE 4 5.4 M
	PHASE 5 3.7 M

## Dormitories (4)

Accommodates up to 480 students living on campus, relieving the challenge of limited off-campus housing near the NU campus. Engages more students in on-campus activities, which builds Northrise culture and traditions.

## Alumni House

A dedicated facility on campus for Northrise Alumni and their families to visit as the NU Alumni Association becomes a contributor to the future of Northrise.

## Faculty Duplexes (4)

Housing that dramatically increases the appeal of Northrise to potential faculty, and puts them into closer community with students.

## School of Engineering Classrooms

Features lecture classrooms, lab and computer study areas, and meeting rooms for student/faculty consultation. Will house a large student lounge and practical learning space for class projects and hands-on experience.

## Schools of Nursing and Social Work Classrooms

Includes lecture space, basic science laboratory rooms, a computer study area, and a simulation laboratory for nursing students.

## School of Agriculture Classrooms

Contains teaching and laboratory classrooms, a computer lab, and meeting rooms for team projects and faculty consultation. The AG Building will be located near Northrise Farms for close coordination, hands-on learning, research projects, and participation in local farming.

## Northrise University Student Center

As campus population grows, the NU Student Center will become the hub of student life. Features a gymnasium, computer study area, library, cafeteria, and offices for student services.

## NU Convocation Center

Northrise will not only host its own graduations and other ceremonies, but will be able to host conferences and cultural events, helping Northrise become a cultural center within the Copperbelt region of Zambia.

# MASTER PLAN: PHASE THREE

## First Priority: Maintenance and Security Building

In 2020 Northrise University's campus expanded with the construction of a new 120-student dormitory, a new state-of-the-art classroom building for the School of Nursing, and a 6-bedroom lodge, the Alumni House. Northrise University is expanding the Maintenance and Security departments to support the oversight and upkeep of these new spaces and the continued increased enrollment.

Furthermore, this new building will feature a cafe and space for students to rest, study, and connect. A critical component of transformation at Northrise is student life, where mentoring and relationships bind students to Christ and to others.

*"The best part about living in the dorms is Bible Study because it is a time of learning and growth. Living on campus also allows me quick access to class and the school library."*

– Chita

## Phase Three Opportunities

### Additional Structures

A new classroom building specifically designed for our Engineering programs is included in Phase 3. Our graduates are in high demand, and we can extend the Northrise transformation into new sectors of Zambia through the School of Engineering currently in development.

As Northrise University continues to grow, demand for student housing increases. With limited off-campus housing nearby, many students make a long commute by bus, bike, or foot. These students have little opportunity to participate in campus life. This second of four planned dormitories will be transformational, especially in the near term as the School of Engineering is expected to drive enrollment growth.

**Maintenance and Security Building**  
\$.2 Million Est.

**Engineering Building**  
\$1.7 Million Est.  
 (\$.75M pledged)

**Dormitory**  
\$1.8 Million Est.
